Infrastructure Reimagined and Delivered

ISLA LPG Gas Refilling Facility Construction Project

Client:

ISLA Petroleum and Gas Corporation (ISLA LPG)

Operator:

ISLA LPG

Services:

Design, engineering, supply, fabrication, construction and site installation, commissioning works

Location:

Canlubang, Laguna, Philippines

Project site:

ISLA LPG Canlubang Plant, Laguna, Philippines

AG&P was contracted to undertake the engineering, procurement and construction works for the liquefied petroleum gas (LPG) refilling facility of ISLA LPG in Canlubang, Laguna. AG&P's scope of work included design, engineering, supply, fabrication, construction, site installation and commissioning works.

This state-of-the-art refilling plant provides LPG consumers in Metro Manila and Southern Luzon with easier access to high-quality LPG products and solutions. ISLA LPG also has facilities in Bacolod, Cagayan de Oro, Davao, Iloilo, Pasig, and the provinces of La Union, Leyte and Pampanga.

AG&P provided a dedicated team of experienced professionals to take responsibility for functions at the project site, bridging the demand for scarce onsite labor which significantly reduced workforce costs and timelines. AG&P provided mobile training to our team onsite in addition to project-specific training at AG&P's facilities prior to deployment.

AG&P successfully completed its project scope in November 2013, achieving 202,000 man-hours without Lost-Time Incident (LTI). AG&P continues to hold the world's best construction safety record for safe man-hours, with only one minor LTI over the last decade.
