

AG&P

Infrastructure Reimagined and Delivered

Lube Oil Blending Plant Project

Client:

JGC Philippines

Operator:

Petron Corporation

Services:

Supply, fabrication, galvanization and delivery of steel structures, mechanical erection, piping, insulation and painting works

Location:

North Harbor, Tondo, Manila, Philippines

Yard:

Batangas Heavy Fabrication, Yard 1 San Roque, Bauan, Batangas 4201

AG&P was contracted to undertake the fabrication, galvanization, delivery and mechanical erection of 2,400MT of steel structures, fabrication and installation of 51,000 dia-inch of pipes, insulation and painting works for Petron's new Lube Oil Blending Plant (LOBP).

The world-class plant will blend, process and package Petron's automobile and industrial automotive lubricants and grease for market delivery by 2018. Petron is the largest oil refining company in the Philippines supplying nearly 40% of the country's oil, gas and petrochemical requirements.

AG&P completed the structural steel works in Q4 of 2017, including the installation of 43 static shop fabricated tanks and 83 rotating pumps/motors and erection of 8,800 dia-inch of pipes. There have been zero Lost-Time Incidents (LTI).

AG&P is deeply committed to safety and holds the world's best construction safety record for safe man-hours, with only one minor LTI over the last decade.

AG&P maintains the highest levels of quality and safety for every project and team. Our workers arrive onsite ready to work and fully trained to comply with the latest international safety and quality standards.
