

**AG&P**

Infrastructure Reimagined and Delivered

## Scalable LNG Delivery Platform

### Features:

Platform 1:  
4,000 to 8,000m<sup>3</sup>  
capacity for shallow  
water delivery

Platform 2:  
6,000 to 16,500m<sup>3</sup>  
for open water  
delivery

Utilizes identical  
hull design and  
equipment from  
6,000, 7,500,  
12,000 up to  
16,500m<sup>3</sup>

### Yard:

Batangas Heavy  
Fabrication, Yard 1  
San Roque, Bauan,  
Batangas 4201

AG&P is a 118-year-old industrial infrastructure company with world-leading credentials across our three lines of business: Gas Logistics (LNG supply chain design, development and marketing), Modular Construction and FieldCOM (manpower services and site works). We have a long, established heritage of successfully serving blue-chip clients on some of the world's most demanding projects in the mining, utilities and oil and gas sectors.

AG&P has developed a highly flexible and efficient small-scale vessel for efficiently transferring LNG to power plants, bunker fuel operations, transportation fleets and other industrial users.

AG&P's unique solution combines a shallow draft barge design with a conventional vessel hull over a scalable range from 4,000 to 8,000m<sup>3</sup> capacity for shallow water delivery and 6,000 to 16,500m<sup>3</sup> for open water delivery. This approach focuses on optimizing the storage and marine designs to drive cost efficiencies and adoption.

Each barge utilizes existing GTT membrane hull designs specifically configured to optimize tank configuration. The geometrical membrane tanks are standardized, reducing the cost of customized engineering.

All kits, including accommodation fitments and bridge equipment, are standardized packages, further reducing cost and speeding delivery time. Standardized, add-on equipment and components such as regasification tanks, cryogenic hoses and other technologies can be integrated into the design to create flexible and adaptable storage and transfer solutions to meet customer needs and project specifications.

These standardized solutions not only drive down costs, but also ensure higher quality and safety due to repeatability and experienced installation by AG&P's skilled construction and field teams.
