

## Scalable LNG Delivery Platform

### Features:

Platform 1:  
4,000 to 8,000m<sup>3</sup>  
capacity for shallow  
water delivery

Platform 2:  
6,000 to 16,500m<sup>3</sup>  
for open water  
delivery

Utilizes identical  
hull design and  
equipment from  
6,000 up to  
16,500m<sup>3</sup>

AG&P has developed a highly flexible and efficient small-scale vessel for efficiently transferring LNG to power plants, bunker fuel operations, transportation fleets and other industrial users.

AG&P's unique solution combines a shallow draft barge design with a conventional vessel hull over a scalable range from 4,000 to 8,000m<sup>3</sup> capacity for shallow water delivery and 6,000 to 16,500m<sup>3</sup> for open water delivery. This approach focuses on optimizing the storage and marine designs to drive cost efficiencies and adoption.

Each barge utilizes existing GTT membrane hull designs specifically configured to optimize tank configuration. The geometrical membrane tanks are standardized, reducing the cost of customized engineering.

All kits, including accommodation fitments and bridge equipment, are standardized packages, further reducing cost and speeding delivery time. Standardized, add-on equipment and components such as regasification tanks, cryogenic hoses and other technologies can be integrated into the design to create flexible and adaptable storage and transfer solutions to meet customer needs and project specifications.

These standardized solutions not only drive down costs, but also ensure higher quality and safety due to repeatability and experienced installation by AG&P's skilled construction and field teams.

### Company Overview

Founded in 1900, AG&P is a global industrial infrastructure company, delivering pragmatic gas logistics solutions and construction services to blue-chip clients for some of the world's most demanding infrastructure projects.

AG&P brings global best practices in safety and quality to every project, regardless of location. The company holds a world-leading construction safety record for continuous safe man-hours and its outstanding performance for blue-chip clients demonstrates its execution capabilities. Throughout its history, AG&P has focused on delivering solutions that increase efficiencies, lower costs and accelerate schedule, enabling projects to become operational sooner.
