

AG&P announces support for non-profit initiative to empower university students to improve the Philippines through entrepreneurial action

Manila, Wednesday July 13th, 2016 – AG&P (Atlantic Gulf Pacific Company of Manila Inc.), a leading Philippines-based infrastructure solutions provider, has announced its commitment to the Philippines Chapter of Enactus, an international non-profit organization dedicated to inspiring university students to improve the world through social entrepreneurial action. In the Philippines, Enactus enables the ideas and talents of thousands of university youth to be translated into programs that tackle real problems in local communities across the archipelago from Cagayan De Oro, to Calapan and Batangas.

Following the 2016 Enactus Philippines national event, held in Manila last weekend, Albert Altura, AG&P President said: “AG&P has a long and proud history of supporting the communities where we operate. For more than 116 years, we have been giving back through a wide range of community initiatives including medical programs, disaster relief and creating world-class employment opportunities for young, aspiring Filipinos”.

“We are delighted to be a Diamond Sponsor of Enactus because its ideals of encouraging innovation and entrepreneurialism are closely aligned to our own. Through Enactus, university youth across the Philippines are creating positive change in their local communities through their imaginations, perseverance and commitment,” he added.

Last weekend’s event hosted teams from universities all over the Philippines competing for the chance for their community project to be selected to represent the Philippines at the Enactus World Cup, to be held in Canada in September. The Mariano Marcos State University in Ilocos, Luzon, won the championship, with the University of the Philippines, Los Banos, awarded second place and the Sultan Kudarat State University in Mindanao, awarded third place. AG&P congratulates the winners on their achievements.

About AG&P

Based in the Philippines, Atlantic, Gulf & Pacific Company (“AG&P”) delivers cutting-edge solutions to vessels, plants and projects across the infrastructure lifecycle. AG&P builds the world’s infrastructure in Lego-like pieces called modules from its two state-of-the-art manufacturing facilities 80km south of Manila, covering 150 hectares of land and capable of producing 125,000 tons of assembled modules per year. AG&P has modularized refineries, chemical, petrochemical, power and water plants, LNG apparatus, mining systems, offshore topsides and civil works such as ports and bridges. AG&P provides mission-critical, rapid and innovative solutions for infrastructure from the early planning stages all the way through to and including operations. Our service portfolio includes standardized and customized infrastructure solutions, modular project support and modular manpower. AG&P is also a world-leader in designing, building and operating solutions for the LNG supply chain and application infrastructure.

With 116 years of history, AG&P is committed to the highest safety and quality standards and invests heavily in developing its team of professionals, engineers and technicians through training and education. AG&P improves lives through a diverse range of community development programs offering education, medical services, charity, environmental solutions and relief support to those in need, with an emphasis on the communities where we operate.
