Offshore hook-up
assistance, operations
management and
provision of skilled
craftsmen to complete
structural, mechanical,
piping, E&I, scaffolding,
blasting, painting and
insulation works

Location:
Iraq

Project site:
Al Basra Oil Terminal
(ABOT), Northern
Persian Gulf, Iraq

AG&P was contracted by Saipem SPA to undertake the offshore hook-up assistance and operations management for the Central Metering and Manifold Platform (CMMP) Project in the Northern Persian Gulf, Iraq.

CMMP is part of the Phase 2 development of the Iraq Crude Oil Export Expansion Project (ICOEEP), one of the most important strategic projects in the Iraqi Ministry of Oil's Master Plan for developing offshore loading facilities to increase the country's oil export capability.

AG&P deployed 134 workers to the project site including electricians, pipe and structural welders and fitters, instrument fitters, scaffolders and painters to complete the structural, mechanical, piping, E&I, scaffolding, blasting, painting and insulation works.

AG&P is licensed by the Philippine government to recruit, process and deploy locally based workers to overseas jobs. AG&P is a consistent recipient of awards and recognition by the government and clients for excellence in overseas manpower deployment.

AG&P successfully completed its project scope with zero Lost-Time Incidents (LTI). AG&P has an unmatched global safety record with more than 50 million consecutive man-hours without LTI and only one minor incident over the last decade.
