

AG&P announces support for Holy Trinity College General Santos City in its bid to win the prestigious 2017 Enactus World Cup

Team will be pitted against universities from 35 countries showcasing the world's best social entrepreneurial projects

Manila, September 25, 2017 – Today, AG&P proudly announced its support for a team of young entrepreneurs from Holy Trinity College (HTC) General Santos City, who are representing the Philippines in the 2017 Enactus World Cup, to be held in London from September 26 to 28. The HTC team will pit themselves against 5,000 students from 35 national university teams for the chance to be crowned the best social entrepreneurs for 2017. HTC, who invented a way of developing and selling environmentally-friendly products such as Allura soap and Graviola tea to help families in the city earn more income while curing various skin diseases, believe their project could secure the Philippines its first Enactus World Cup title. AG&P, the nation-building infrastructure company, has supported Enactus for the past two years.

Enactus is an international non-profit organization dedicated to changing the world through community-based action by young students. AG&P has been a diamond sponsor of Enactus since 2016 and has pledged continued support because it believes the non-profit organization's ideals of encouraging innovation and entrepreneurialism are closely aligned to its own.

"AG&P has been continuously supporting the communities where we operate for more than 117 years. As part of our social responsibility efforts, we provide support to Enactus to empower young, aspiring Filipinos who want to make a positive change in their local communities," said Anupam Ahuja, SVP for Strategic Services, AG&P. "We wish HTC the very best luck and look forward to seeing their project and others creating a real impact on everyday lives of the communities where they live," she added.

Top business leaders from across the globe will evaluate the community development projects from 36 universities over two intensive days in London. Each project focuses on ideas that will enhance food security, access to water and/or economic empowerment, with the most economically and environmentally sustainable project to be awarded the 2017 Enactus World Championship. <http://enactus.org/>

About AG&P

Based in the Philippines, Atlantic, Gulf & Pacific Company of Manila (AG&P) is a pioneer of high-value modular infrastructure, now at the forefront of the LNG infrastructure revolution providing gas or LNG to customers via integrated LNG receiving terminals and their supply

chains. AG&P designs, manufactures, finances, leases, operates and maintains regasification and storage terminals, LNG transportation vessels and demand-stimulated assets. From sourcing gas to last-mile delivery, AG&P is the unique integrator that brings all parties together to deliver projects for lower, pragmatic capital cost.

For more than 117 years, AG&P has been a global leader in infrastructure solutions, delivering cutting-edge modularized products and support services to vessels, projects and plants for the energy, resources and industrial sectors. AG&P modularizes infrastructure for refineries, LNG export and import facilities, power, petrochemical, and mining plants, building up to 125,000 tons of dense and complex modules each year.
